## **SYSTEM ~ \*99\*~ PUT ~ AWAY ~ INSTRUCTIONS:**

### **AFTER YOU'VE FINISHED USING YOUR SYSTEM \*99\*:**

#### **#1) = Dry / Clean Rope, #2) = Wet / (& or) Dirty Rope:**

**Once you're finished: #1)** Ensure that the rope is completely dry and clean. **If it IS dry & clean:** Draw the traveler pulley(s) up (fully) ... to the head assembly, while, (AT THE SAME TIME), remove all twists & tangles / in the rope. Then, properly replace all the free side rope into its storage bag. Hold the bag open with one hand / & pull the rope through your fingers / & \*randomly\* down into the bag. As the bag fills with rope / push it down FLAT. This will ensure that the rope comes out free of twists & tangles the next time you need to use it. After all the rope is inside the bag, place the hardware in the bag on top of the rope.

**IF THE ROPE IS WET (&) OR SOILED: #2)** Wash the rope (by hand) either with cool water / or with a mild liquid soap, such as the type you would use on your dishes. **(NO CLEANING COMPOUNDS CAN BE USED ~ ONLY MILD DETERGENT)**. Once clean, hang the rope over something like an "A" frame ladder, in an \*airy\* area (out of direct sunlight), until the rope is completely dry. Once dry / draw the lower / traveler pulley(s) up (fully) ... to the head assembly and follow the instructions in #1 above.
